Important Resolutions Delivered in Patches

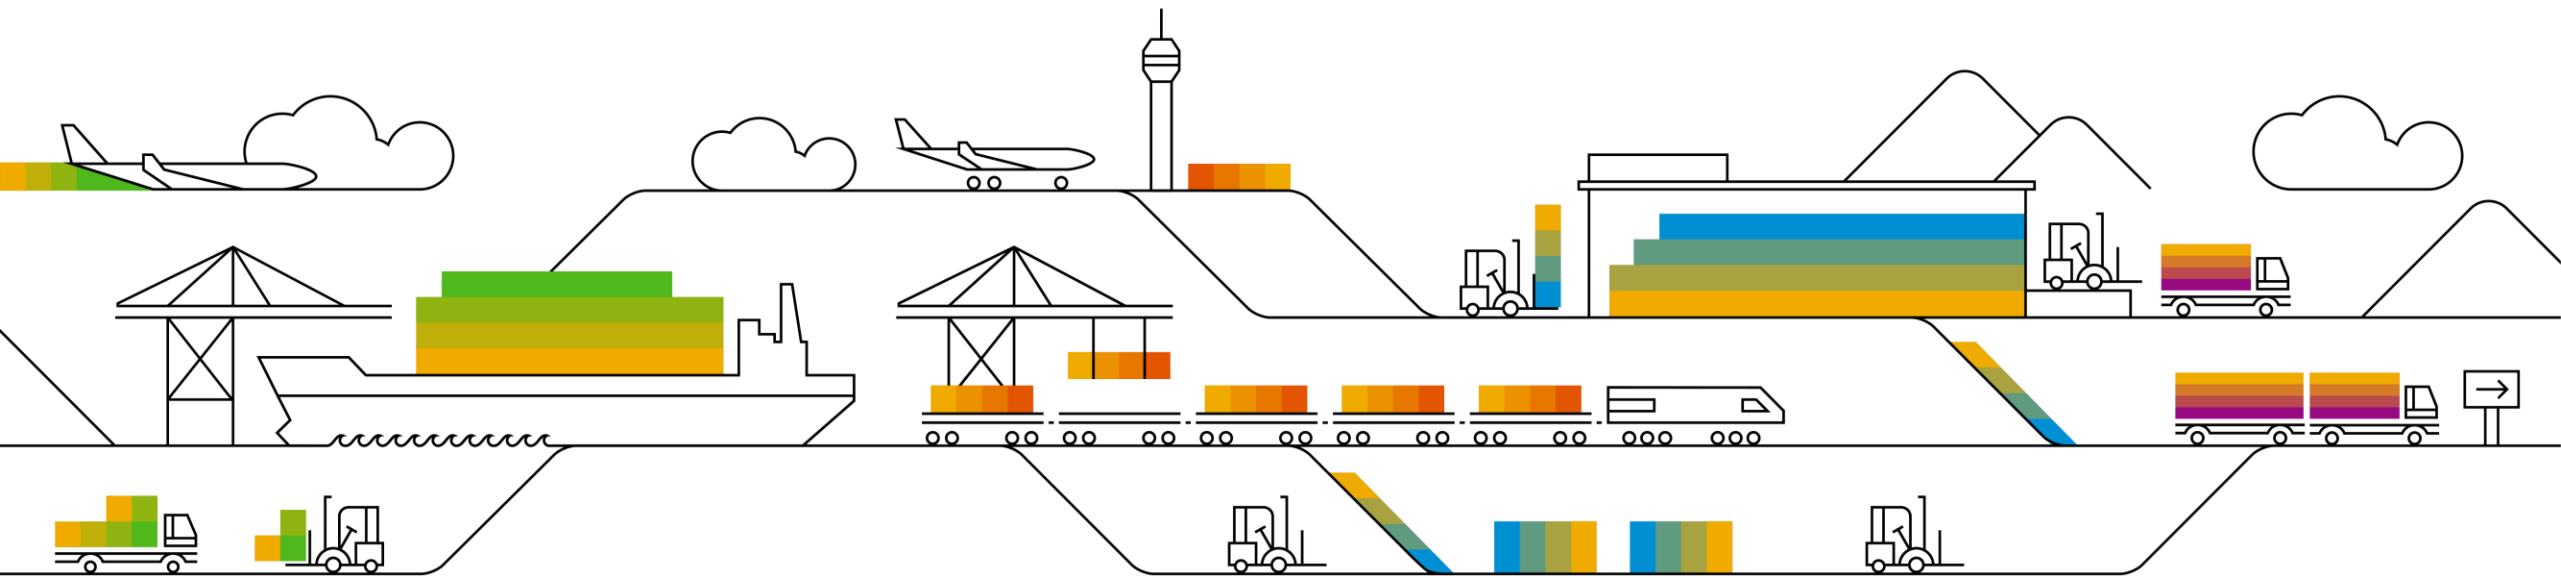

Intercompany integration solution 2.0 for SAP Business One

This presentation provides an overview of the most important resolutions which have been delivered in patches.

For a complete overview of corrections delivered in a specific patch, please refer to the corresponding patch overview note.

For Troubleshooting and Compatibility Information, refer to SAP Note [1844555](#)

Intercompany integration solution PL33

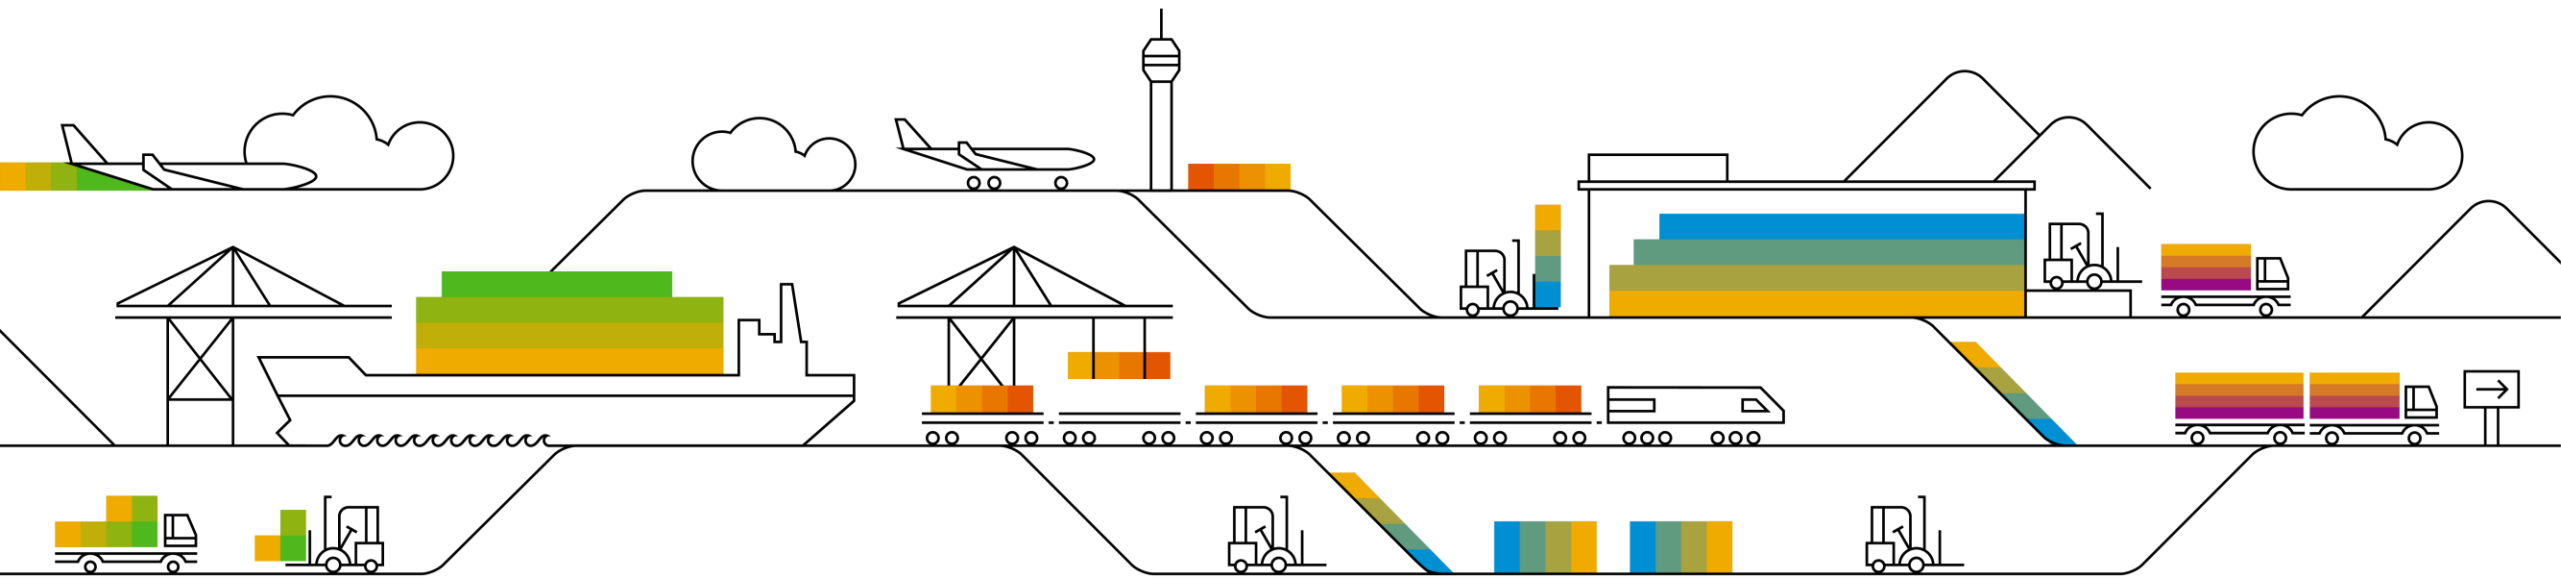

Intercompany integration solution PL33

SAP Overview Note [2809071](#) – SAP Note [1844555](#) Troubleshooting

Description	Details in SAP Note
Sender E-mail Configuration restores to default one whenever solution is deployed	2809009
SAP DBTech JDBC: [339]: invalid number: not a valid number string while updating Sales Employee field value in an A/R invoice in SAP HANA DB	2792652
Error variable in SBO_SP_TRANSACTIONNOTIFICATION is set to empty by Intercompany Stored Procedure	2809103
In marketing documents, tab switches to Contents tab whenever any field on Logistics tab is selected	2809100
Customer Ref Number field on delivery document cannot be updated	2809211
In Sales Order screen, cursor jumps to Customer field after selecting item at line level	2809212
Error while creating Incoming Payment using Bank Transfer	2812675
Key Mapping records for Intrastat Configuration Service object are not available in SAP HANA DB environment	2813124

Intercompany integration solution PL32

Intercompany integration solution PL32

SAP Overview Note [2780393](#) – SAP Note [1844555](#) Troubleshooting

Description	Details in SAP Note
Intercompany Integration Solution supports B1iF 2.0	2781395
Mandatory Package for running Intercompany Solution PL32 on B1iF 2.0	2779982
Performance enhancement in allocation transactions	2781364
Email alerts with TLS protocol not working	2781378
Runtime error occurs while registering add-on in company database	2781396
Incorrect amount set while using foreign currency in Incoming Payment to Draft Outgoing Payment transaction	2781250
Replication support of Withholding Tax properties in India localization	2781379
Error while replicating business partner when Mexican and Indian localizations are configured	2781365

Intercompany Integration Solution supports B1iF 2.0

SAP Note [2781395](#)

Features

The integration framework 2.0 as well as service layer on SAP HANA is being adopted for the intercompany integration solution.

This change is delivered without disruption. For now, customers installing from scratch should use the new options, existing customers can optionally use these advantages and convert their configuration.

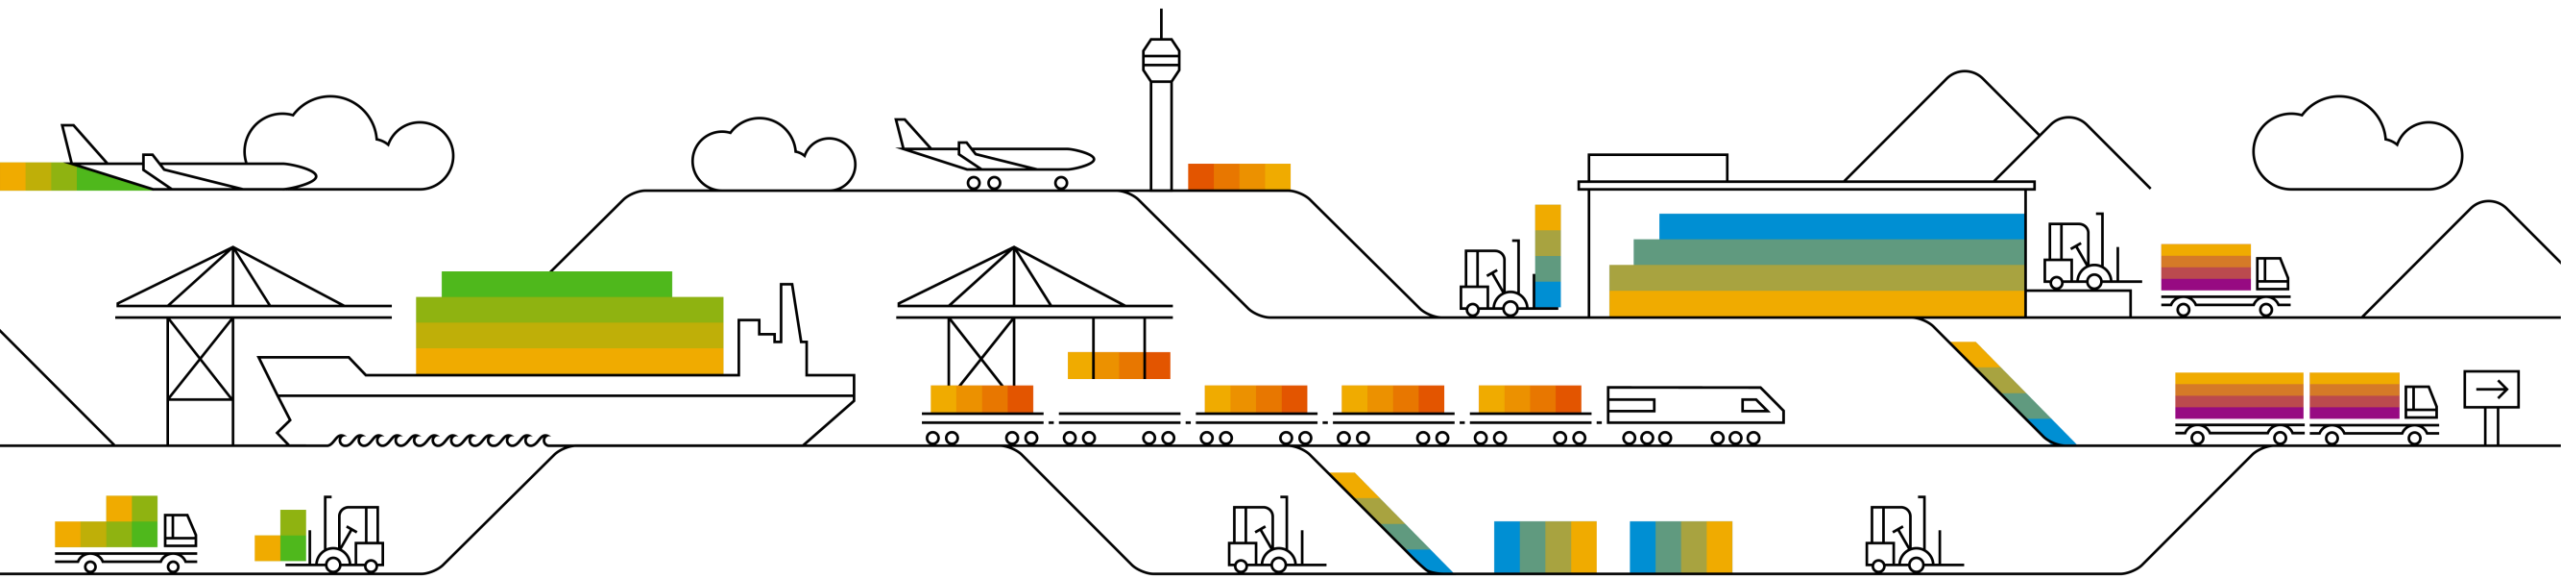

As a central place for further and continuously updated info, please follow

blogs.sap.com/intercompany-integration-on-a-new-basis-b1if-2.0/

Benefits

SAP's own add-on for intercompany is revamped with B1iF 2.0. Using this latest technology leads to significant simplifications and improvements in performance as well as in TCO. You can get more details on the integration framework 2.0 in this [blog](#), and its benefits in this [blog](#).

Intercompany integration solution PL31

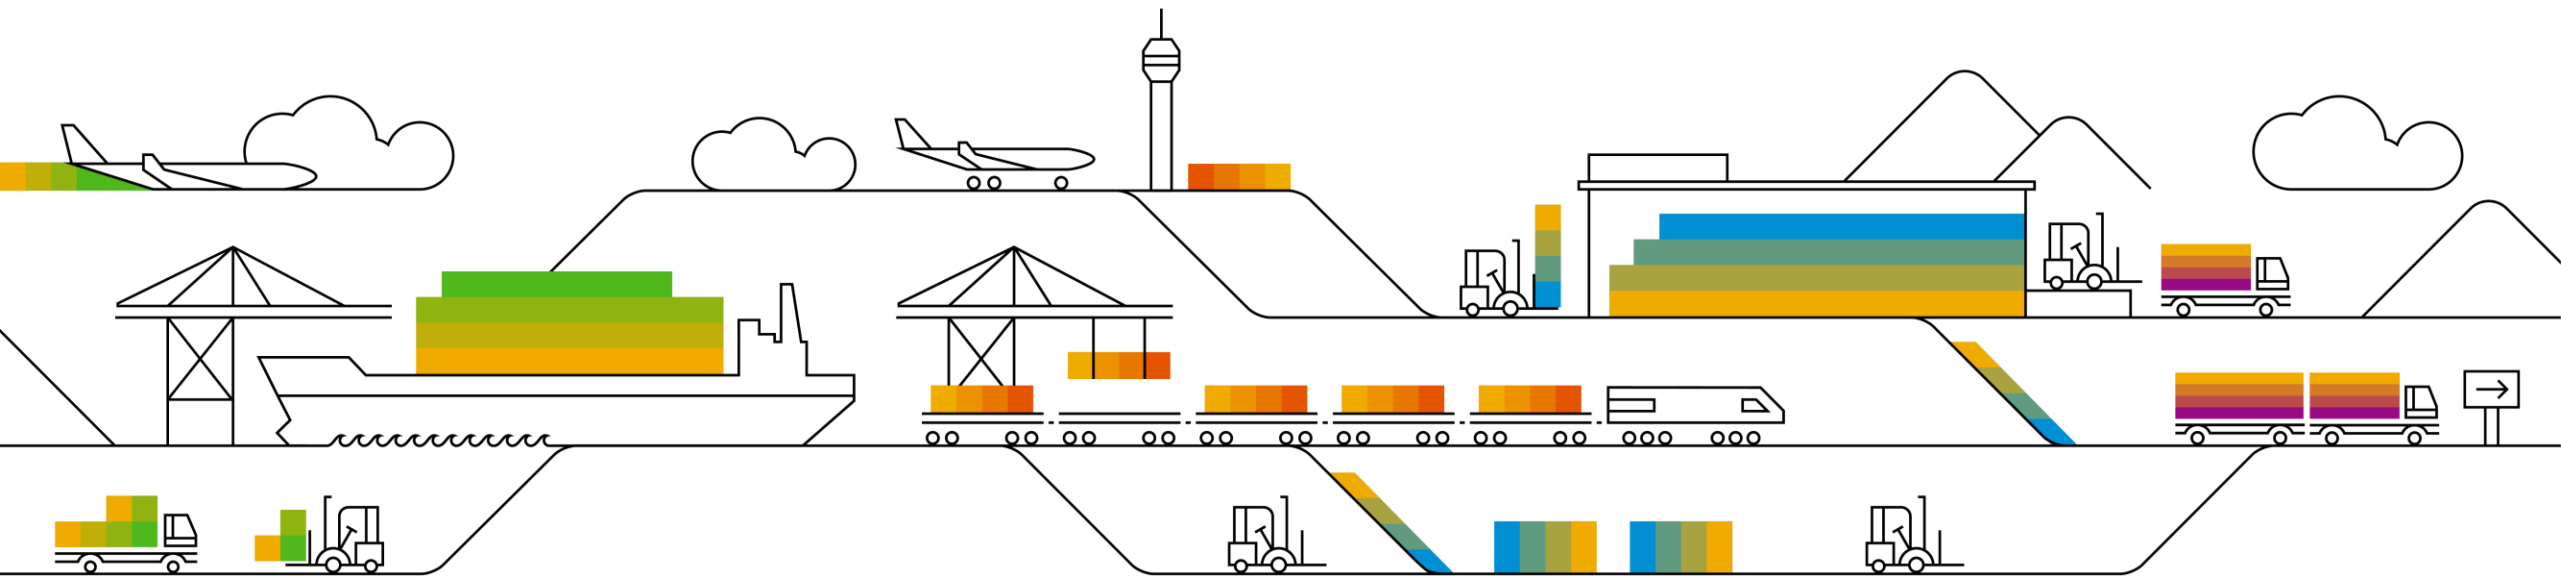

Intercompany integration solution PL31

SAP Overview Note [2741669](#) – SAP Note [1844555](#) Troubleshooting

Description	Details in SAP Note
Fields from Intercompany TAB are getting copied to first new TAB created on Marketing Documents	2741715
Introduction of Purchase Quotation to Sales Quotation cycle in Intercompany Trade	2741716
Intercompany Vendor Payment using Treasury Company	2741717
Enhancement in document exchange cycle related to direct creation of firm marketing document	2741731
“Adj. Trans. (Period 13)” of Journal Entry is available for replication	2741732
Incoming payment to Outgoing payment for account type transactions	2742847
Replication support of properties available on Planning Data tab of Item master data	2742848
Replication support of properties in marketing documents for India Localization	2742884
Performance improvement in HANA DB environment	 2743003

Intercompany integration solution PL30

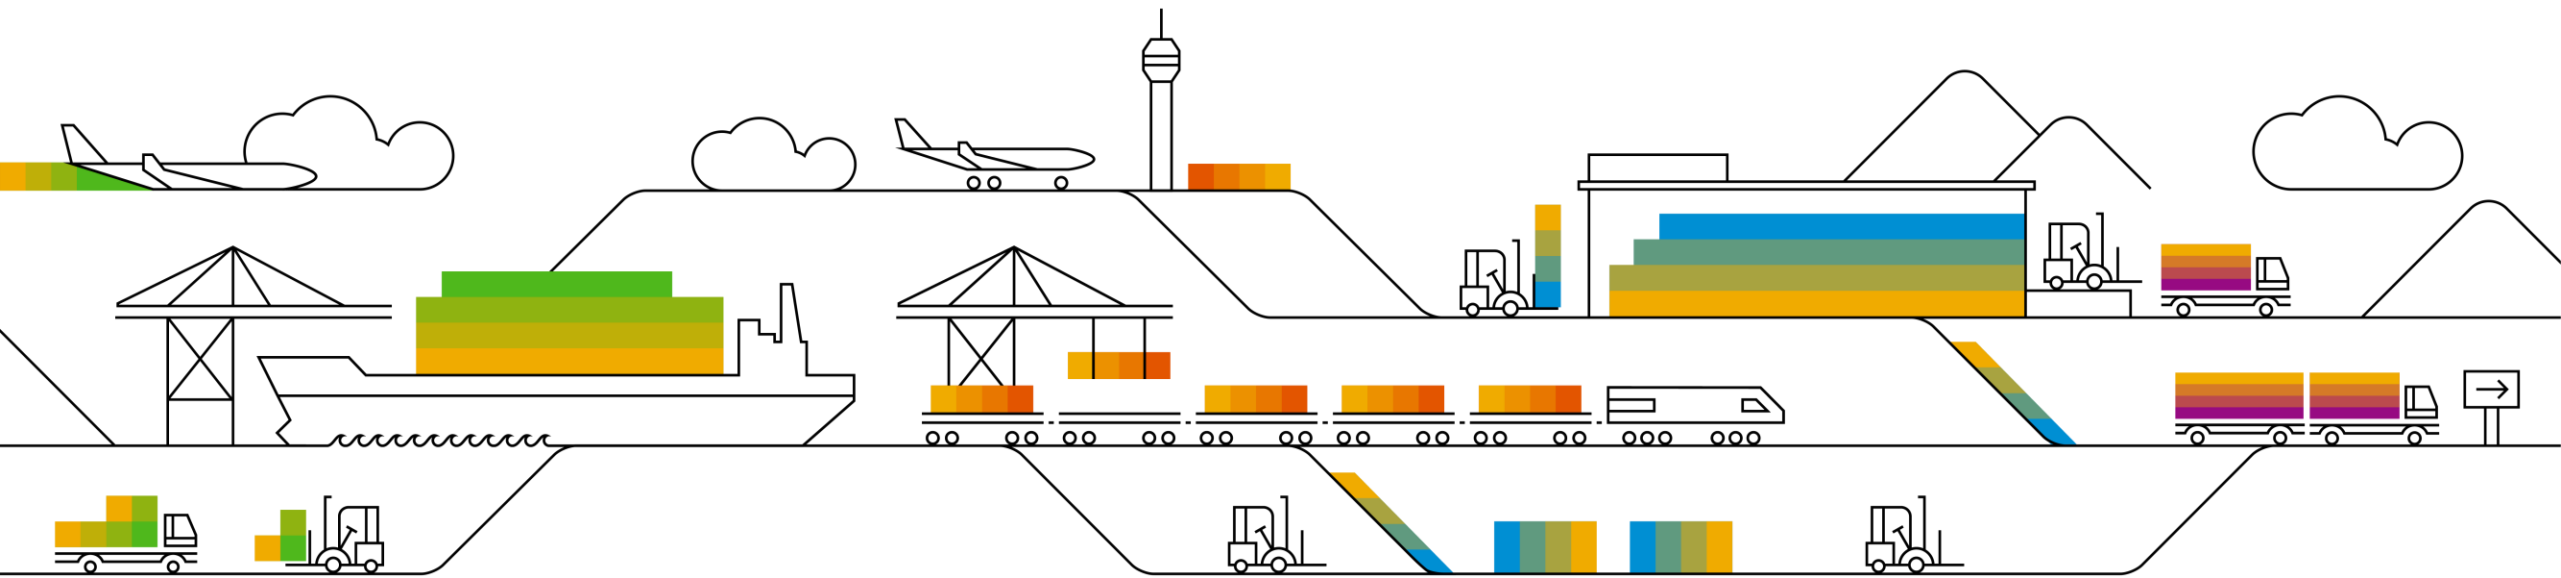

Intercompany integration solution PL30

SAP Overview Note [2717980](#) – SAP Note [1844555](#) Troubleshooting

Description	Details in SAP Note
Allocation enhancement for multiple branches enabled companies Get an overview in these video clips	2719279
Object replication fails with error could not create native thread	2718000
Project Codes master data replication gets stuck in processing	2719311
Intercompany scenario package activation takes longer time than expected	2719335
Intercompany Troubleshooting Tool enhancements in PL30	2719337
GST and HSN fields on Item master data do not replicate in India Localization	2718032
GST relevant objects and properties enabled for India localization	2719386

Description	Details in SAP Note
Performance improvement on UDF Replication screen	2675234
UDF replication is available for Item Groups and Price Lists objects	2675235
Intercompany Solution Supports MS SQL 2017	2675981

Intercompany integration solution PL27

Intercompany integration solution PL27

SAP Overview Note [2660892](#) – SAP Note [1844555](#) Troubleshooting

Description	Details in SAP Note
Unable to save key mapping records for banks object due to incorrect number of records retrieved after import process	2660922
Issue while resizing Chart of Accounts and Users screens in SAP Business One	2663117
Exchange Rates, Account Classification, Global Data Distribution, and Source Tax objects fails to replicate	2663118
Error while performing consolidation process if consolidation company is allowed to be set as Multiple Branches enabled	2663076
Intercompany Troubleshooting Tool enhancements	2663119
UDF replication is available for Project Codes object	2663158
Unable to assign multiple branches to B1i user while deploying the solution	2663109
The cost centers assigned on the payment line are removed after delegation	2665175

Exchange Rates, Account Classification, Global Data Distribution, and Source Tax objects fails to replicate

SAP Note [2663118](#)

Features

Exchange Rates, Account Classification, Global Data Distribution, and Source Tax objects replicate successfully even in case custom company template is applied on the participating branch companies

Benefits

- Improved system handling

Intercompany Troubleshooting Tool enhancements

SAP Note [2663119](#)

Features

Enhancements of the Troubleshooting Tool in PL27 are:

- *Landscape -> Last Deployment Details*
 - It displays the value *Key Mapping records saved* as *Yes* or *No*
 - In case the key mapped records of the *Currencies* object are saved or not
 - After deploying the ICO Solution

- *Intercompany Trade -> Branch Partners*
 - It displays information in case duplicate branch representing business partner(s) exist
 - In any of the participating branch companies

Benefits

- Enhanced feedback information for better troubleshooting handling

UDF replication is available for Project Codes object

SAP Note [2663158](#)

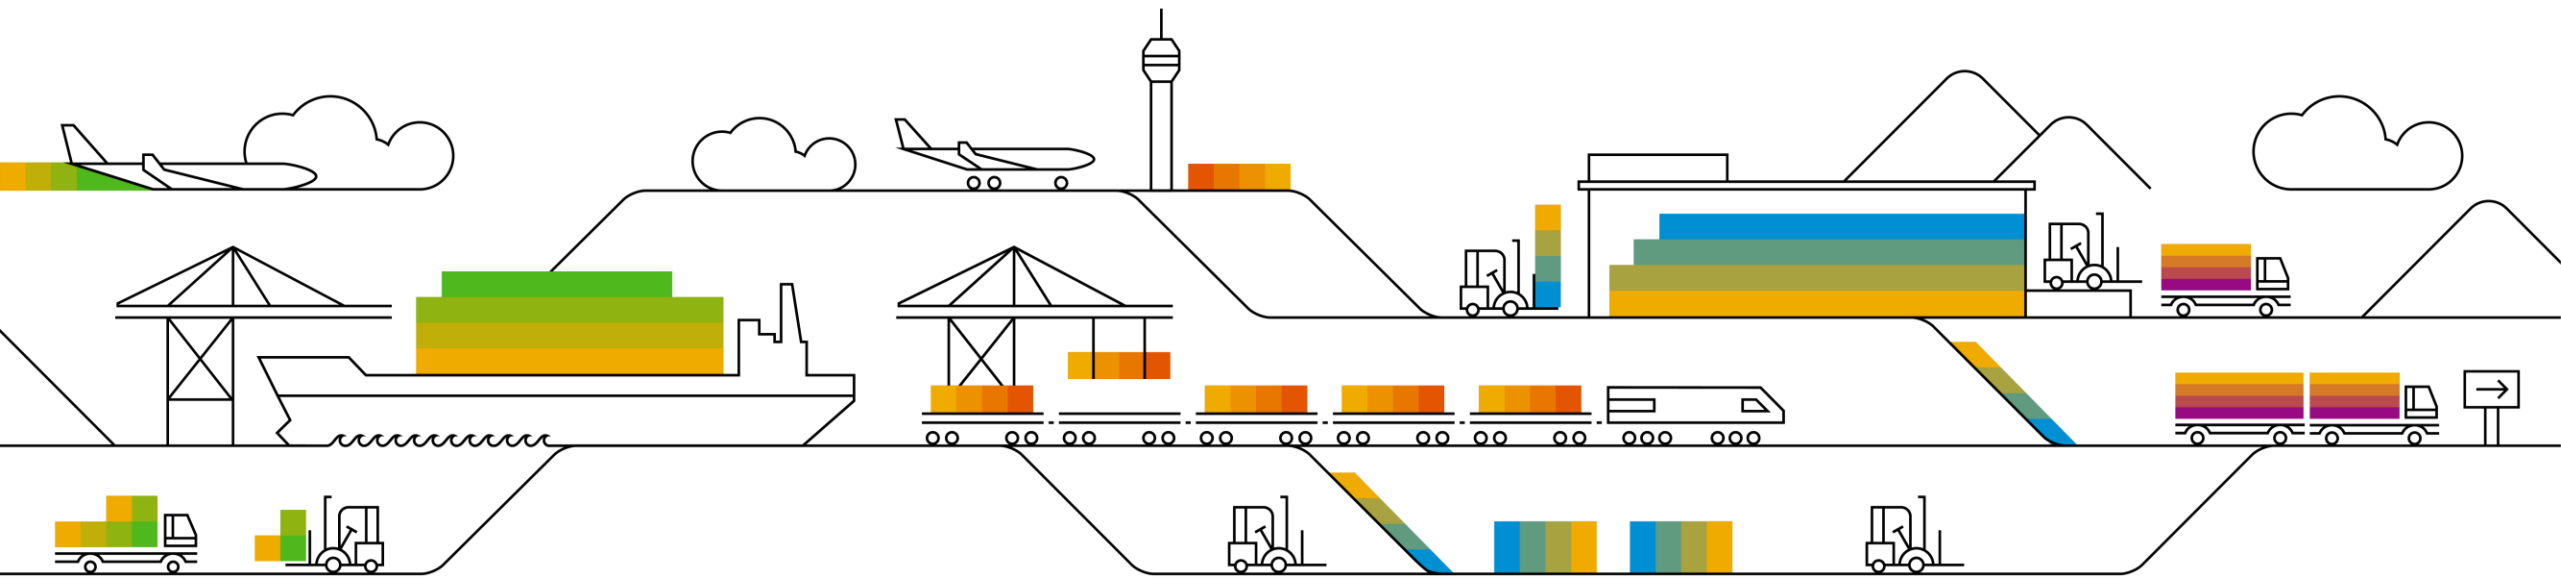

Features

UDF replication is available for Project Codes object.

Benefits

- The UDF replication for Project Codes object gives the possibility to define UDFs and replicate this data in all relevant company databases for usage

Intercompany integration solution PL26

Intercompany integration solution PL26

SAP Overview Note [2639445](#) – SAP Note [1844555](#) Troubleshooting

Description	Details in SAP Note
Restriction on retry count in auto retry of failed messages	2639449
Intercompany Solution compatible with Multiple Branches	2639394

Intercompany Solution Compatible with Multiple Branches

SAP Note [2639394](#)

Features

Intercompany solution is now compatible with multiple branches.

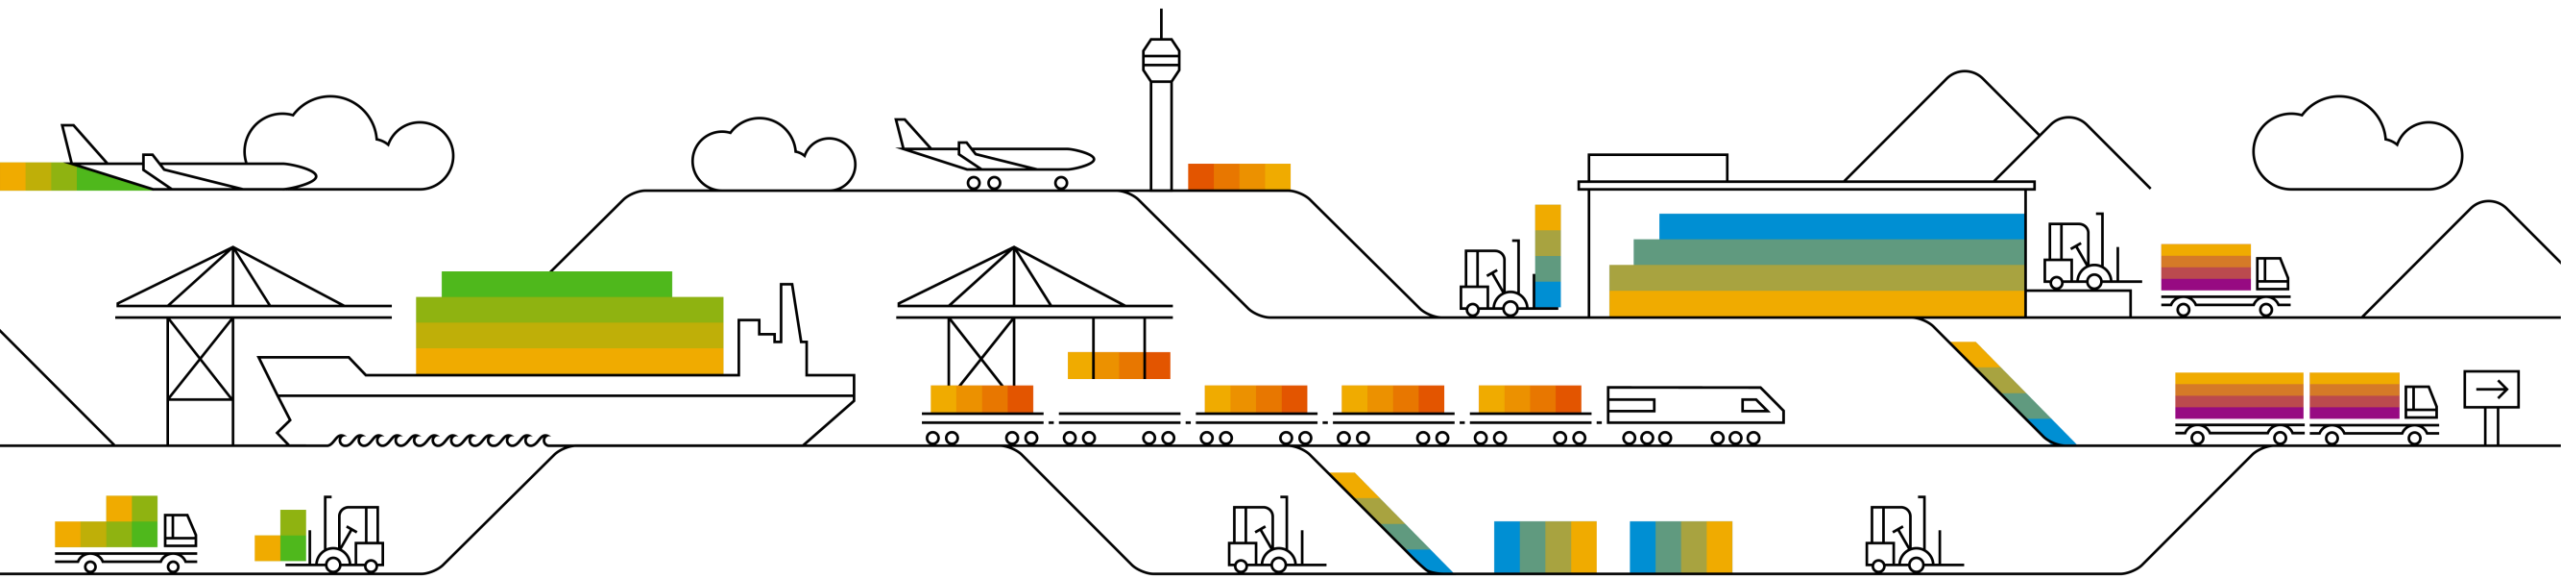

Enterprises with multiple legal entities may want to use multiple branches and Intercompany integration solution together to handle various business scenarios such as:

- Using Intercompany solution to integrate subsidiaries in different geographies and using multiple branches solution to handle different business units in one of the subsidiary company
- Using multiple branches solution and integrating subsidiaries in different geographies using Intercompany solution

Benefits

- Flexibility to use both solutions in combination – it's finally no either/or decision anymore
- A completely new approach to capture the entire intercompany functionality combined with multiple branches to reach new business cases, advantages and possibilities

Intercompany integration solution PL25

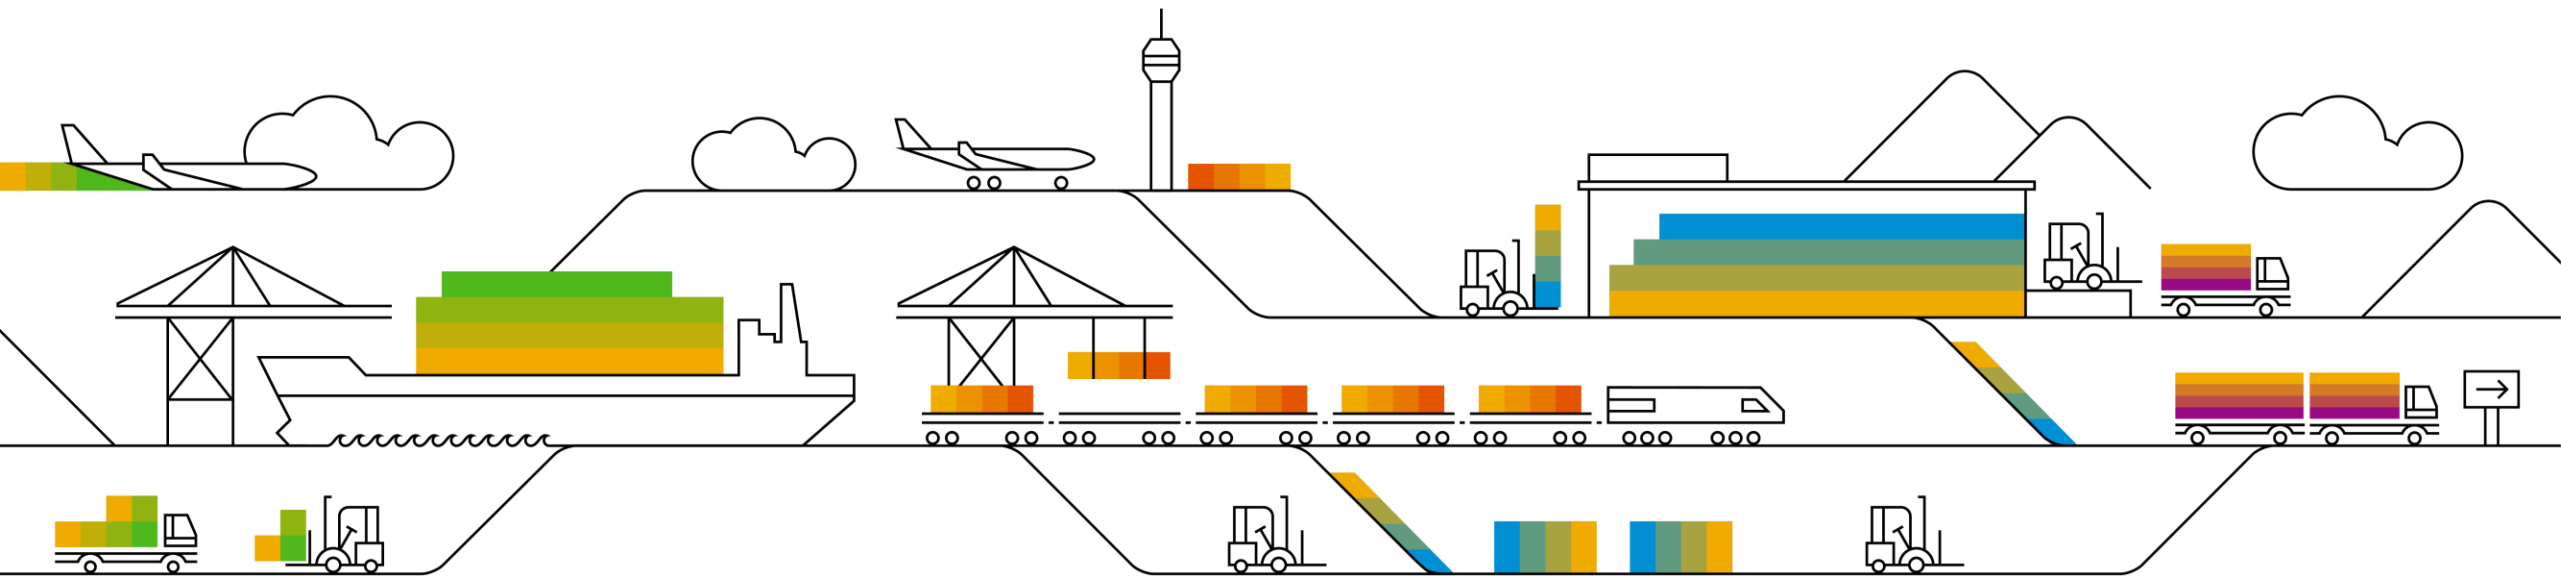

Intercompany integration solution PL25

SAP Overview Note [2587332](#) – SAP Note [1844555](#) Troubleshooting

Description	Details in SAP Note
Intercompany Solution is compatible with SAP Business One 9.3	2588058
Discount Group master data fails to replicate to receiver company	2588063
Deployment process fails with missing or incorrect value in licenseServer field of SLD	2588142
Inserted value too large for column error message while performing Centralized Payment transaction	2588141
Adj. Trans. (Period 13) checkbox on Journal Entry screen is grayed out when ICO Solution is running	2588021

Intercompany integration solution PL24

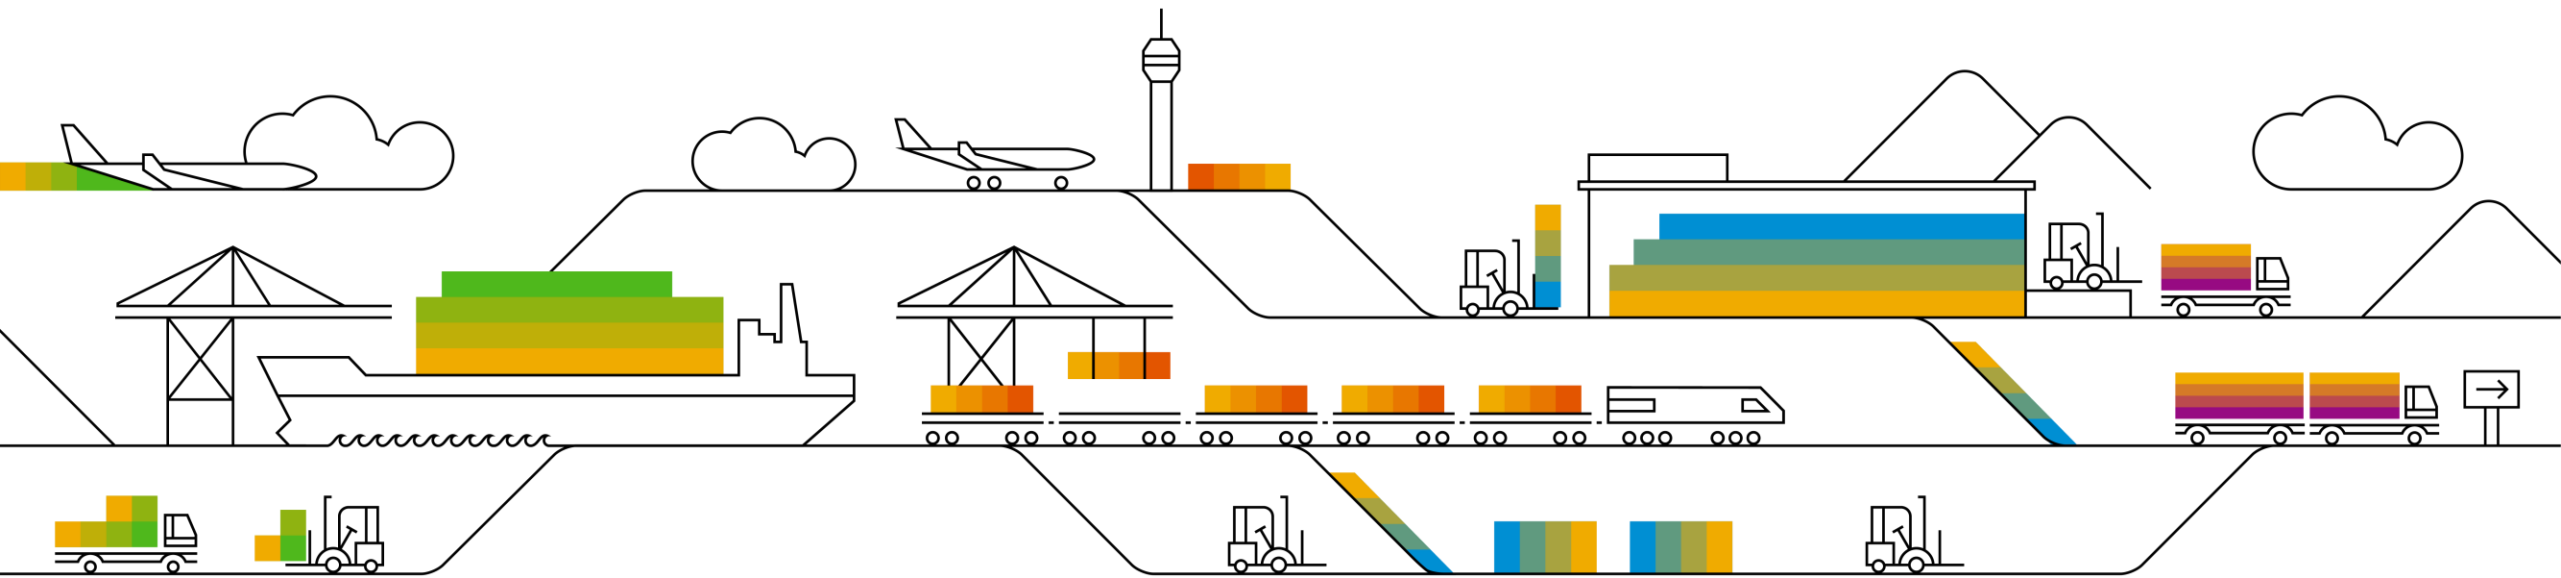

Intercompany integration solution PL24

SAP Overview Note [2495282](#) – SAP Note [1844555](#) Troubleshooting

Description	Details in SAP Note
Copy To A/R Down Payment process from Sales Order document allowed for Intercompany transactions	2552552
Copy To A/P Down Payment Invoice process from Purchase Order document allowed for Intercompany transactions	2552498
Solution allows creation of Company Templates with same or duplicate name	2552794
Unable to create A/R Invoice document using Intercompany Solution	2504787

Intercompany integration solution PL23

Intercompany integration solution PL23

SAP Overview Note [2429182](#) – SAP Note [1844555](#) Troubleshooting

Description	Details in SAP Note
Company Template to Create Branch Company	2429183
Centralized Initialization of Branch Companies	2429040
Automatic Data Harmonization of Currency Master	2429175
Copy Intercompany Setups data	2428916
Performance Improvement in G/L Branch Allocation	2429191
Intercompany Solution Cockpit	2487689
Additional Properties Available for Master Data Replication	2487697

Company Template to Create Branch Company

SAP Note [2429183](#)

Features

Intercompany solution allows the user to optionally setup template for a branch company in administration console.

All masters' data are replicated to Template Company like Branch(es) and Head Office Company.

Benefits

- With the help of branch Template Company, user can easily initialize a new branch company in the intercompany landscape
- This significantly reduces the time in deploying a new company in the intercompany solution

Centralized Initialization of Branch Companies

SAP Note [2429040](#)

Features

Copy initialization setup allows user to perform the initialization setups in all branch companies from the intercompany administration console.

Benefits

- Enables the user to perform initialization steps in one go in all branch companies
- Significantly reducing the solution implementation time
- Using Copy Initialization Setup, User can perform following initialization setups in one go:
 - General Settings - Display Settings
 - Document Settings - Manage Freight
 - Currencies Setup
 - Encryption Key
 - Integration Framework Server Details
 - Messaging Setup

Automatic Data Harmonization of Currency Master

SAP Note [2429175](#)

Features

The intercompany solution allows user to automatically harmonize the currency master data in all branch and consolidation companies configured in the landscape.

The solution automatically creates the missing currencies in all branch and consolidation companies.

For example, the first branch company only has USD in the currency master, the second branch company has USD and EURO in their currency master and the third has USD and Canadian Dollars in their currency master.

In this case, the application automatically creates EURO and Canadian Dollars as currencies in the first company, Canadian Dollars in the second company and EURO in the third company.

Benefits

- This automation saves a lot of time and reduces errors considerably

Copy Intercompany Setups data

SAP Note [2428916](#)

Features

The Copy Intercompany Setups feature allows user to copy a branch company's setup data from one branch company to one or multiple branch companies.

Benefits

- This saves the user from login in each branch database and perform the setup steps individually, significantly reducing the implementation time
- User can copy following setup information from one branch company to multiple companies:
 - Intercompany General Settings
 - Users and Users Settings
 - Users Setup
 - Intercompany Alert Administration
 - Global Data Authorization
 - Global Data Distribution Templates
 - Business Partner Group Control Account

Performance Improvement in G/L Branch Allocation

SAP Note [2429191](#)

Features

The performance of G/L branch allocation screen is significantly enhanced.

Benefits

- Performance!

Intercompany Solution Cockpit 1/3

SAP Note [2487689](#)

Features

The intercompany Solution Cockpit allows user to view all intercompany relevant information from one single screen:

The screenshot displays the 'Intercompany Solution Cockpit' interface with the following sections:

- Landscape Status:**
 - SAP B1 and Add-On Version: Consistent (SAP B1: 920180) / Consistent (Add-On: 2.0.23.0)
 - Deployment Status: Deployed On: 16/06/2017 - 11:07:45 / Total Companies: 6
 - Scenario Package: 2.0.23.0 (active)
 - Template Company: 1
 - Custom Company Template In Use: 3
 - Key Mapping: Complete
- Integration Status:**
 - IPO-Steps Status: Active
 - Blocked Queues: none
 - Message Log of Today: [Bar chart showing 0 successful, 0 failed, 0 filtered, 0 in-process]
 - Under Process Replication: 0
 - Failed Replication: 0
- Scheduled Processes:**
 - BP Balances Scheduling: Configured
 - Allocation Accounts Scheduling: Configured
 - Auto Purge Logs: Configured
 - Auto Retry Errors: Configured
- Financial Consolidation and Trade Processes:**
 - Consolidation Mode: Manual
 - Last Consolidation Execution Status: 2017-05-30 12:14:35
 - Unposted Marketing Documents: 1 unposted documents
 - Unposted Journal Vouchers: 4 unposted vouchers
- System Resource Information:**
 - Database Size: 1.76 GB
 - BusStore Documents: 29792
 - Used Memory: 0.856 GB
 - Used Memory: 23.44 %
 - Available CPUs: 8

The screenshot shows the 'Message Log' section with a filter and a detailed table of message transactions.

Message Log Filter:

- From: 2017-06-16 00:00:00
- To: 2017-06-16 23:59:59
- Sender System: [Dropdown]
- Receiver System: [Dropdown]
- Sender Object: [Dropdown]
- Receiver Object: [Dropdown]
- Paging: 50
- Buttons: Display Log, Delete Log

Message Log Table (Successful records):

S.No.	Delug	Message	Export	Delete	Sender System	Sender Object	Key	Sender Date	Sender Time	Receiver System	Receiver Object	Receiver Date	Receiver Time	Status

Intercompany Solution Cockpit 2/3

SAP Note [2487689](#)

The following tiles are available in the Intercompany Solution cockpit:

Landscape Status

- Version of SAP Business One and Add-on
- Deployment Status
- Scenario Package
- Template Company
- Custom Company Template in Use
- Key Mapping

Financial Consolidation and Trade Processes

- Consolidation Mode
- Last Consolidation Execution Status
- Unposted Marketing Document
- Unposted Journal Vouchers

Integration Status

- IPO Steps Status
- Blocked Queues
- Message Log of Today
- Under Process Replication

System Resource Information

- Database Size
- BizStore Documents
- Used Memory in GB
- Used Memory in Percentage
- Available CPUs

Scheduled Processes

- Failed Replication
- BP Balances Scheduling
- Allocation Accounts Scheduling
- Auto Purge Log
- Auto Retry Errors

Server Status

- Maximum Memory
- Used Memory
- Detected CPU cores
- Scheduler Threads
- Last start of Integration Platform
- Crashed last Time

Intercompany Solution Cockpit 3/3

SAP Note [2487689](#)

Benefits

- A completely new approach and level to capture the entire intercompany information at a glance. This makes the system easy to operate and significantly improves the overall handling, monitoring, and troubleshooting, as well as allowing reactive and proactive actions.

Additional Properties Available for Master Data Replication

SAP Note [2487697](#)

Features

Intercompany integration solution 2.0 PL23 allows the replication of this additional master data **Agent Code** and **Chapter Id**

In summary, as of PL23 the replication of following properties in the Item and Business Partner master data is supported:

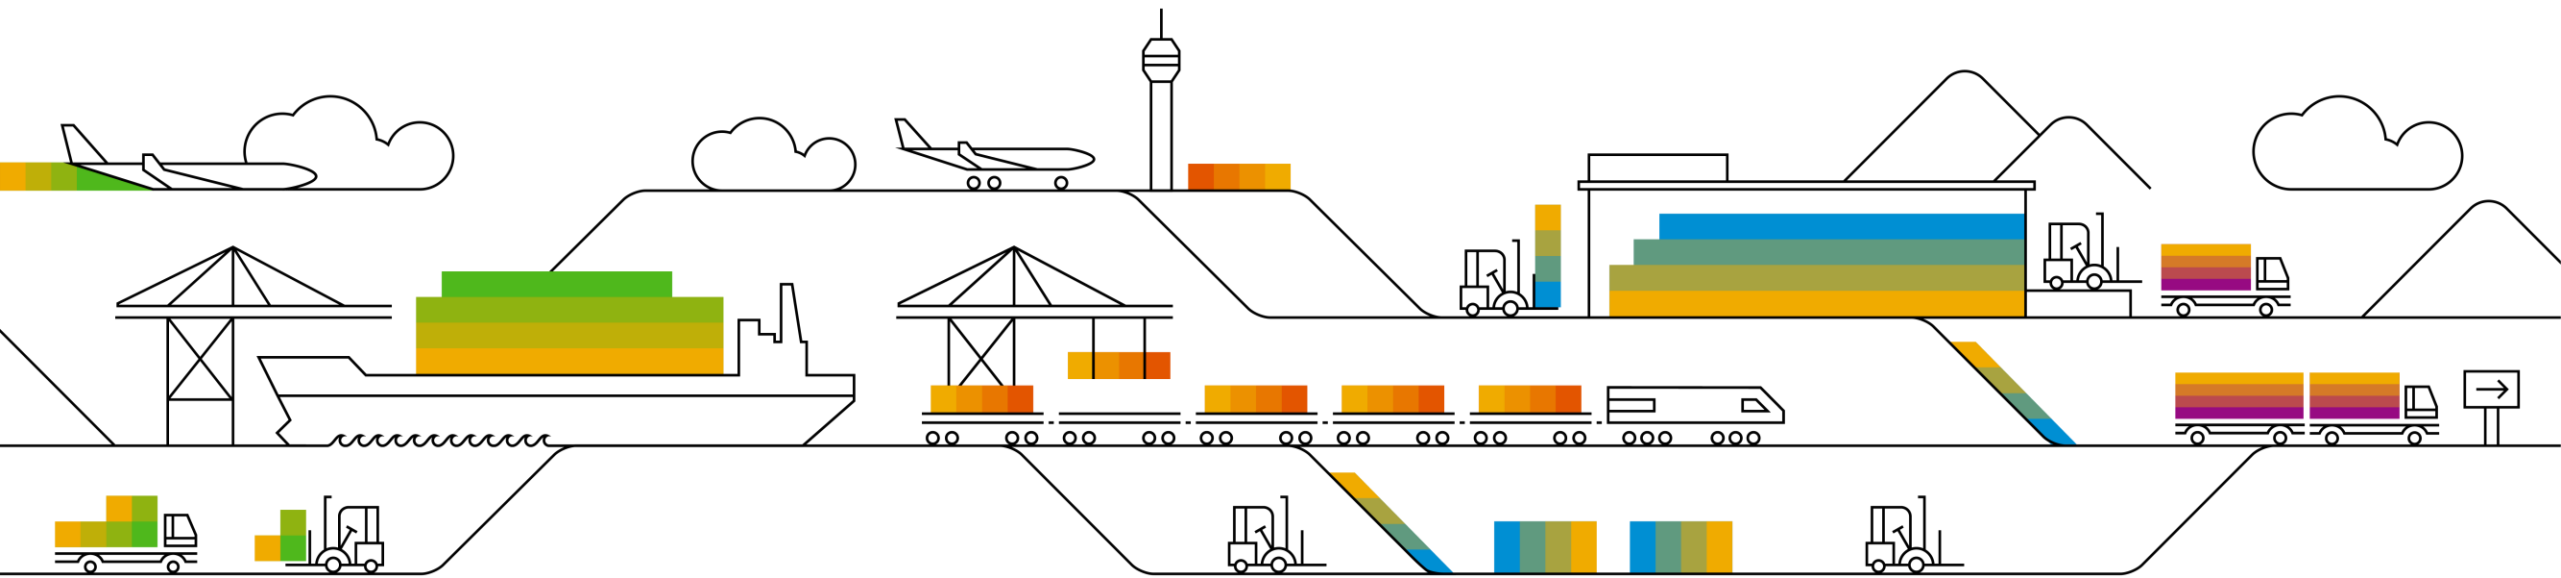

Business Partner Master Data

- LinkedBusinessPartner
- U_B1SYS_FiscIdType
- VATRegistrationNumber
- BusinessType
- RepresentativeName
- AgentCode

Benefits

- Extended support for intercompany processes and further automation of Master Data Replication

Intercompany integration solution PL21

Intercompany integration solution PL21

Overview Note [2429181](#) – SAP Note [1844555](#) Troubleshooting

Description	Details in SAP Note
Support for Non-Localized Companies	2429038
Data Replication Performance Improvement	2429149
Improved G/L Account Search Functionality	2429174
Automatic Generation of Branch G/L Account Codes	2429164
Simplified Intercompany Setups	2429129
Enhanced A/P Service Invoice Allocation	2429138
Enable Replication of Manual Distribution Rule master to all branch and consolidation companies	2429165

Support for Non-Localized Companies

SAP Note [2429038](#)

Features

- Customization of company templates for non-localized countries possible
- Localized countries:
Australia, Austria, Belgium, Brazil, Canada, Chile, Costa Rica, Czech Republic, France, Germany, Guatemala, Hungary, Ireland, Israel, Italy, Mexico, New Zealand, Netherlands, Panama, Poland, P.R. China, Russia, Singapore, Slovakia, South Africa, Spain, Switzerland, UK, USA

Information and best practices using intercompany integration solution for SAP Business One for non-localized countries, refer to SAP Note [2154976](#)

Benefit

- The Intercompany solution allows better support for non-localized countries

Data Replication Performance Improvement 1/2

SAP Note [2429149](#)

Features

- Intercompany integration solution code optimizations:
 - Reducing or merging the code units
 - Executing DI calls in batches
 - Executing SQL queries only to retrieve data

- Performance improvements:
 - Company template
 - Master Data Replication
 - Document Exchange Cycle
 - Financial Consolidation

- User specification of Journal Entry batch size to be processed for financial consolidation possible

Data Replication Performance Improvement 2/2

SAP Note [2429149](#)

Benefit

- Better performance - Performance Test Results (*conducted under controlled lab conditions*):
 - Consolidation process / Journal Entry import up to **700% faster**
 - Item Master Data up to **35% speedier**
 - Business Partner Master up to **40% quicker**
 - Document Exchange up to **30% faster**

Improved G/L Account Search Function

SAP Note [2429174](#)

Features

- Enable wild card search
- Enhancements in the following screens:
 - Branch Account Setup
 - Default Accounts Setup
 - Default Accounts By Balance Sheet
 - Default Accounts By Profit Loss
 - Consolidation Accounts Setup
 - Vendor Group Control Accounts

Benefit

- Better search options and optimized user handling

Automatic Generation of Branch G/L Account Codes

SAP Note [2429164](#)

Features

- Automatization of
 - Generation of branch G/L account codes i.e. Due from and Due to accounts
 - Set these accounts in Branch Account Setup window
 - Automatic creation of G/L accounts supported in segmented and non-segmented Chart of Accounts

Benefit

- Saving time in creating G/L account codes for branch companies

Simplified Intercompany Setups

SAP Note [2429129](#)

Features

- Automatic creation of drop-ship warehouse and default values
- Default accounts by Profit & Loss and Balance Sheet classification
- Default setting for Consolidation Translation Method in Chart of Accounts
- Branch Accounts Setup
 - Allowing usage of same accounts in Due from and Due to
 - Allowing duplication of accounts for Due from and Due to

Benefits

- Faster implementation, less error prone and simplified system handling
- Easier reconciliation of accounts

Enhanced A/P Invoice Service Allocation

SAP Note [2429138](#)

Features

- Invoice Posting date automatically sets as posting date in A/P Invoice allocation window
- Sender document posting date in recipient company documents
- A/P Invoice document information available in receiver company document:
 - Vendor Code
 - Vendor Name
 - Vendor Ref. No.
 - Document Number
 - Document Row Number
 - Posting Date
 - Document Remarks

Benefit

- Improved document handling and less manual corrections

No part of this publication may be reproduced or transmitted in any form or for any purpose without the express permission of SAP SE or an SAP affiliate company.

The information contained herein may be changed without prior notice. Some software products marketed by SAP SE and its distributors contain proprietary software components of other software vendors. National product specifications may vary.

These materials are provided by SAP SE or an SAP affiliate company for informational purposes only, without representation or warranty of any kind, and SAP or its affiliated companies shall not be liable for errors or omissions with respect to the materials. The only warranties for SAP or SAP affiliate company products and services are those that are set forth in the express warranty statements accompanying such products and services, if any. Nothing herein should be construed as constituting an additional warranty.

In particular, SAP SE or its affiliated companies have no obligation to pursue any course of business outlined in this document or any related presentation, or to develop or release any functionality mentioned therein. This document, or any related presentation, and SAP SE's or its affiliated companies' strategy and possible future developments, products, and/or platforms, directions, and functionality are all subject to change and may be changed by SAP SE or its affiliated companies at any time for any reason without notice. The information in this document is not a commitment, promise, or legal obligation to deliver any material, code, or functionality. All forward-looking statements are subject to various risks and uncertainties that could cause actual results to differ materially from expectations. Readers are cautioned not to place undue reliance on these forward-looking statements, and they should not be relied upon in making purchasing decisions.

SAP and other SAP products and services mentioned herein as well as their respective logos are trademarks or registered trademarks of SAP SE (or an SAP affiliate company) in Germany and other countries. All other product and service names mentioned are the trademarks of their respective companies.
